A Powerful and Intuitive Asset Tracking App

Asset tracking app works by performing three main functions Initial Identification, Receiving, and Consuming, you can simply track and manage the assets in your organization using an intuitive, simple and complete asset management system. The app streamlines asset inventory processes using barcode or RFID technology

Asset tracking Features:

Asset Tracking allows you to better manage your physical assets to bring value to your business. Here are some of the features:

Activity Tracking

Track all activities related to your company's physical assets and simplify the way you handle the check-in / check-out of assets.

Location Tracking

Easily find your assets and equipments with no effort, with our location tracking tagging feature.

Barcoding and RFID

Asset Tracking app is fully integrated with barcode devices and support RFID technology for accurate and easy tracking.

Reservation

The reservations functionality allows you to plan ahead for any asset you need to consume in the future, and helps you avoid conflicts related to the booking of materials.

History Tracking

Gain a detailed view at your asset history so you can monitor trends in asset usage, and enhance utilization.

Inventory Count

You can simply perform inventory count using a barcode scanner to update your current stock levels.

Depreciation Tracking

The app helps in tracking asset lifecycle and managing depreciation with detailed reports so you can lower cost and make improvements.

Reports and analytics

Keep an eye on the usability of your assets with powerful and easy reporting.

Mobile technology platform

This solution works on Microsoft Windows operating system, which is compatible with a variety of popular handheld device.

Seamless Integration with ERP system

The app can seamlessly be integrated with ERP systems for better data transparency.

How can you benefit from Asset Tracking App?

- Improve efficiency and cut costs due to better management of company's assets
- Reduce loss of equipments
- Achieve maximum asset utilization
- Easily find the required asset promptly
- Reduce errors associated with manual data entry
- Achieve real time communication with your enterprise system
