Streamline Your Shopping Experience with AutoReceipt from ECS designed specifically to comply to Egyptian Tax Authorities

Welcome to the future of digital receipts! Our E-Receipt Add-on solution not only offers convenience and organization but also ensures compliance with the Egyptian Tax Authorities. Say goodbye to manual paperwork and hello to a seamless, tax-compliant business operation.

Benefits of E-Receipts:

Organizational Ease
With digital receipts, you can easily organize and categorize your expenses electronically, making it simpler to track your purchases and manage your budget.
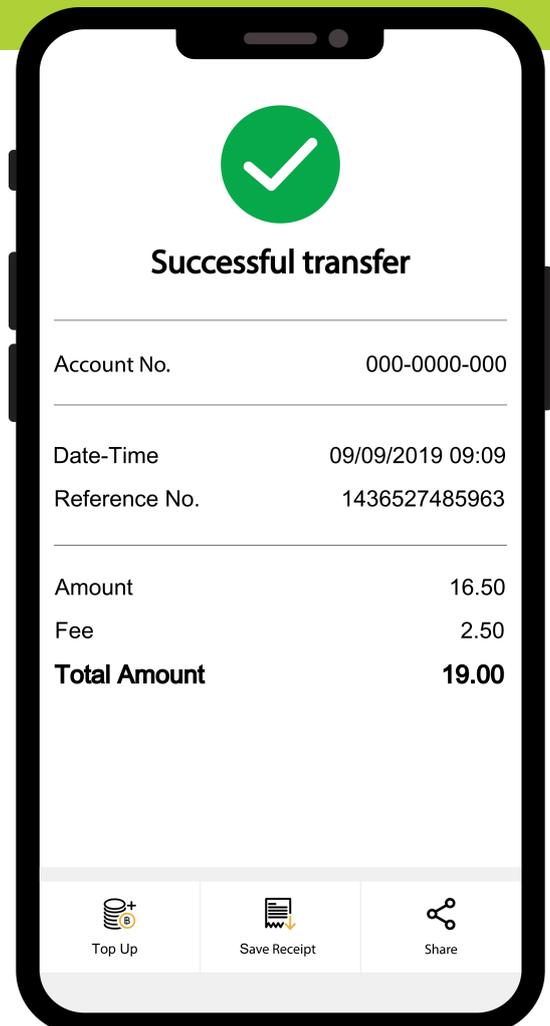

Streamlined Receipt Process
Streamlines the Receipt process and automatically submits data to the relevant tax authority.

Environmentally Friendly
By opting for E-Receipts, you contribute to reducing paper waste and promoting a greener planet.

Enhanced Security
E-Receipts offer improved security compared to paper receipts. Digital encryption ensures that your personal information remains protected, minimizing the risk of identity theft.

Streamline Your Shopping Experience with E-Receipts

Here are some key features of the E-Receipt solution customized to comply with Egyptian tax regulations:

Features of AutoReceipt include:

Tax-Compliant Receipt Generation:
The E-Receipt solution generates electronic receipts that adhere to the specific requirements outlined by the Egyptian tax authorities. It ensures the inclusion of mandatory information such as the taxpayer's identification number, transaction details, VAT rates, and any other relevant tax-related information.

Automatic VAT Calculation:
The solution automates the calculation of Value Added Tax (VAT) based on the applicable rates defined by Egyptian tax regulations. It accurately calculates the VAT amount for each transaction, reducing the risk of errors and ensuring compliance with tax laws.

Real-time Data Synchronization:
AutoReceipt solution seamlessly synchronizes transaction data with the tax authorities' systems in real-time. This ensures that the tax authority receives the necessary information promptly and enables businesses to meet the reporting requirements without delays or manual intervention.

User-Friendly Interface:
AutoReceipt solution features a user-friendly interface using SAP FIORI that simplifies the process of generating, managing, and retrieving electronic receipts. It requires minimal training for users to navigate the system efficiently

Digital Signature and Authentication:
To ensure the integrity and authenticity of electronic receipts, the solution employs digital signature technology. This helps verify the origin and integrity of the receipts, providing assurance to both businesses and tax authorities.

Secure Data Storage and Archiving:
AutoReceipt solution securely stores and archives electronic receipts in accordance with Egyptian tax regulations. It ensures the long-term preservation of receipts, allowing businesses to access and retrieve them whenever required for auditing purposes or compliance checks.

Comprehensive Reporting:
The solution offers robust reporting capabilities, allowing businesses to generate comprehensive reports on their electronic receipts. These reports can be customized to meet specific reporting requirements, providing businesses with valuable insights into their financial transactions.

Integration with POS:
AutoReceipt solution seamlessly integrates with Point of Sales POS. This integration ensures a smooth flow of data between the E-Receipt solution and the POS system, minimizing manual effort and enhancing data accuracy.
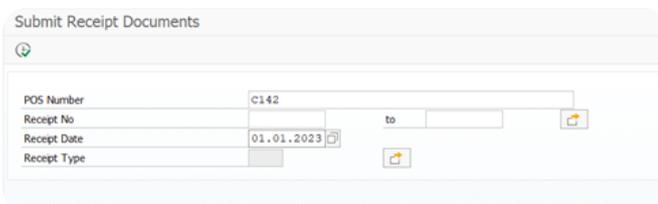

How AutoReceipt Works

Authenticate POS
AutoReceipt allows the authentication of
POS to get access token to be used to access
other protected APIs of the solution.

Submit Receipt Documents
Taxpayer can submit one or more signed
documents to eReceipt solution

Get Receipt Details
Allows user to retrieve a single receipt/return
receipt full details including validation
results.
