# One Easy, Efficient, Powerful POS system

In today's highly competitive business environment, retailers want to ensure the highest degree of customer satisfaction, improve store productivity and increase revenue. Real-Time Point of Sale (RPOS) is a full featured system that links the point of sale terminals to the Back End of SAP ERP system like accounting, warehouse, CRM & more. The solution has successfully achieved SAP certification which underlines its long standing commitment to deliver direct integration and ease of implementation with SAP solution-based environment.

## RPOS Features

RPOS is designed specifically to streamline your retail daily activities and boost store productivity. Main Features include:

### Flexible Payment Options

RPOS supports multiple payment methods (Cash, Visa, cheque and loyalty Card) which streamline the process of transaction. With our solution you can process multiple payment methods for one sale.

### Multi-Currency

RPOS enables your business to have the flexibility to perform sales with different currencies. You can choose the currency in which your customers wish to pay for their purchases.

### Enhanced Return Management

The solution offers an easy tool to manage the returned items. It has two types, either the return can be with reference (with predefined maximum days limit) or without reference

### Printing Customization

Easy to customize your receipt template to be displayed the way you want and you can automate receipt printing upon saving the document.

### Reporting Capabilities

Get proactively prepared for any challenge that might face your business with the powerful analytical reports based on real-time information.

### Physical Inventory Counts

No need to close your store location to conduct a physical inventory counts. We offer you a powerful application by which this process is successfully managed easily.

### Loyalty Program, Discounts and Promotions

RPOS includes loyalty program that is designed to motivate repeat purchase and keep your best customers coming back and spending more.

### Manage Your Employees and Ensure Store Safety

Every cashier has his own username and password assigned in the RPOS. All the transactions made by the cashier are stored by day and time.

## What Can RPOS Offer?

- Superior customer service
- User friendly interface that enables your employees to be more productive and customer-focused
- Highly scalable solution that can be deployed across multiple stores
- Highly configurable solution to adapt to your specific business needs
- Full integration with SAP ERP and CRM
- Valuable promotion procedures that allocate targeted promotions across stores
